- Python
- MongoDB
- GraphQL
- Supabase
- Docker
- Framer Motion
- Webflow

LANGUAGES

- English (Fluent)
- Yoruba(Fluent)

PROFILE

I'm a full-stack developer building modern, scalable web applications that bridge design and functionality. I've delivered end-to-end solutions for clients as a freelancer, from crafting intuitive front-end experiences to designing and deploying robust back-end systems. My work spans responsive UIs, API development, and database design, always focused on performance, maintainability, and client impact.

WORK EXPERIENCE

INTECU, OAU

IT Intern

August 2025 - present

- Gained hands-on experience in computer networking, network troubleshooting and configuring routers, switches, and VLANs.
- Supported internal IT operations including help desk, system updates, and device troubleshooting.
- Explored core concepts in cybersecurity, including threat mitigation and endpoint protection.

BibleStars TV

Backend Engineer

January 2024 - February 2025

- Designed efficient database schemas aligned with business logic requirements.
- Secured data flows with JWT authentication, rate limiting, and input sanitization.

TeenTech Foundation

Frontend Developer Intern

June 2022 - September 2022

- Collaborated closely with senior developers to design and develop dynamic, visually appealing websites for NGOs and educational organizations.
- Assisted in the implementation of responsive web designs, ensuring optimal performance across various devices and browsers.
