EDUCATION

Obafemi Awolowo University

Bachelor of Science in Computer Engineering

Ile-Ife, Osun

Jan. 2022 – August 2027

Vivid Mind College

Senior Secondary School Certificate

Epe, Lagos

Sept. 2016 – July 2021

EXPERIENCE

Networking / IT Intern

INTECU, OAU

Aug. 2025 – Present

Ile-Ife

- Gained hands-on experience in computer networking, network troubleshooting and configuring routers, switches, and VLANs.
- Assisted in website development using Next.js, SQL, AI tools and basic CMS tools.
- Explored core concepts in cybersecurity, including threat mitigation and endpoint protection.
- Supported internal IT operations including help desk, system updates, and device troubleshooting.
- Learned principles of effective workplace communication and IT documentation.

Backend Engineer

BibleStars TV

Jan. 2024 - April 2025

Remote

- Architected scalable API systems with 99.9% uptime to power frontend interfaces.
- Designed efficient database schemas aligned with business logic requirements.
- Secured data flows with JWT authentication, rate limiting, and input sanitization.
- Collaborated with frontend teams to define REST/GraphQL contracts for seamless integration.

Frontend Developer Intern

TeenTech Foundation

June 2022 – Sept. 2022

Lagos

- Collaborated closely with senior developers to design and develop dynamic, visually appealing websites for NGOs and educational organizations.
- Assisted in the implementation of responsive web designs, ensuring optimal performance across various devices and browsers.
- Supported the integration of third-party APIs and services to enhance website capabilities.
- Engaged in regular team meetings and brainstorming sessions to contribute ideas and stay updated on project progress.

PROJECTS

EventOrbit | TypeScript, Next.js, Redux, Motion, Express.js, MongoDB, Puppeteer

July 2025 – Present

- Developed a modern, full stack event ticketing platform using Next.js and TypeScript, leveraging Express.js for the core RESTful API and MongoDB for persistent data storage.
- Implemented comprehensive booking and organizer workflows, including secure event creation, ticket authentication, and high volume data handling via the Express.js backend.
- Ensured platform stability and reliability across all critical user flows by integrating automated browser testing and validation using Puppeteer.

Krist | Next.js, TypeScript, React Query, Redux, Supabase

Dec. 2024 – Jan. 2025

- Developed the client side of a modern e commerce platform using Next.js and TypeScript, focusing on performance and static site generation for SEO.
- Engineered a robust data layer using React Query for server state management and caching, resulting in faster load times and an improved user experience.
- Integrated Supabase as the backend service, implementing secure user authentication, product catalog management, and seamless data synchronization.

TECHNICAL SKILLS

Languages: Go, SQL (Postgres), Python, TypeScript, JavaScript, HTML/CSS

Frameworks: React, Next.js, Express.js, Nest.js, Flask, FastAPI

Developer Tools: Git, Docker, Kubernetes, Google Cloud Platform, Visual Studio Code

Libraries: Puppeteer, (Framer) Motion, Numpy
