EDUCATION

Obafemi Awolowo University

Bachelor of Science in Computer Engineering

Ile-Ife, Osun

Jan. 2022 – August 2027

Vivid Mind College

Senior Secondary School Certificate

Epe, Lagos

Sept. 2016 – July 2021

EXPERIENCE

Frontend Engineer

Dec. 2025 – Present

KeenChess

Remote

- Built the core frontend architecture using Next.js and TypeScript, optimizing rendering performance for real-time gameplay.
- Orchestrated complex game logic and move validation by integrating chess.js, while managing high-frequency global state (game history, timers) seamlessly with Zustand.
- Designed immersive user experiences using Motion for fluid piece animations and Recharts to visualize player statistics and game analytics.
- Implemented strict schema validation for user inputs and game configurations.

Networking / IT Intern

Aug. 2025 – Dec.2025

INTECU, OAU

Ile-Ife

- Gained hands-on experience in computer networking, network troubleshooting and configuring routers, switches, and VLANs.
- Assisted in website development using Next.js, SQL, AI tools and basic CMS tools.
- Explored core concepts in cybersecurity, including threat mitigation and endpoint protection.
- Supported internal IT operations including help desk, system updates, and device troubleshooting.
- Learned principles of effective workplace communication and IT documentation.

Backend Engineer

Jan. 2024 - April 2025

BibleStars TV

Remote

- Architected scalable API systems with 99.9% uptime to power frontend interfaces.
- Designed efficient database schemas aligned with business logic requirements.
- Secured data flows with JWT authentication, rate limiting, and input sanitization.
- Collaborated with frontend teams to define REST/GraphQL contracts for seamless integration.

PROJECTS

JobSpot | FastAPI, Python, GraphQL, PostgreSQL, Redis, Arq, WebSockets, Docker

Dec. 2025 – Jan. 2026

- Engineered a scalable full stack hiring platform using a containerized FastAPI monolith, integrating Strawberry GraphQL for type safe APIs and native WebSockets for instant bidirectional communication.
- Architected a hybrid chat system with Redis caching and PostgreSQL persistence, supporting instant messaging and secure media uploads.
- Implemented an optimized full text search engine using PostgreSQL's `tsvector` and trigram matching.
- Orchestrated production deployment on Render using Docker and CI/CD best practices.

EventOrbit | TypeScript, Next.js, Redux, Motion, Express.js, MongoDB, Puppeteer

July 2025 – Present

- Developed a modern, full stack event ticketing platform using Next.js and TypeScript, leveraging Express.js for the core RESTful API and MongoDB for persistent data storage.
- Implemented comprehensive booking and organizer workflows, including secure event creation, ticket authentication, and high volume data handling via the Express.js backend.
- Ensured platform stability and reliability across all critical user flows by integrating automated browser testing and validation using Puppeteer.

TECHNICAL SKILLS

Languages: Go, SQL (Postgres), Python, TypeScript, JavaScript, HTML/CSS

Frameworks: React, Next.js, Express.js, Nest.js, Flask, FastAPI

Developer Tools: Git, Docker, Kubernetes, Google Cloud Platform, Visual Studio Code

Libraries: Puppeteer, (Framer) Motion
